## OPEN WATER DIVER PROGRAM

The purpose of the **PADI Open Water Diver** program is to provide you with the knowledge and skills needed to safely gain experience in the diving environment, and ultimately to dive independently. The program is *performance-based* and designed to take you through simple to complex learning objectives. All included skills are designed to be logical, realistic, and to apply to practical diving situations. Our “beginner” oriented program is for ages 12 and up. No unusual swimming ability is necessary, although a lap swim and 10 minute tread/float is required. Interested in college credit? Ask us how!
