

# PADI ReActivate

Haven't been diving lately and want a quick scuba refresher? The ReActivate™ program is the perfect way to update your dive skills and knowledge from the PADI Open Water Diver Course before jumping back into the water. Whether you want a few reminders or need to go over the basics, ReActivate is personalized for you: You conveniently review scuba concepts on your tablet, mobile device or computer, then go diving with a PADI Professional. It's quick and easy, and a good way to prepare for your next PADI course or get ready for a diving vacation. The best part is, divers who complete both the knowledge and in-water skill refresher receive a replacement certification card with a ReActivated date on it.

Any PADI certified diver who wants a refresher or pre-travel update should ReActivate. Dive shops appreciate seeing a recent ReActivate date on your certification card because it means you're ready to dive in.

\*Your PADI certification does not expire. Participation in PADI ReActivate™ is not mandatory, but recommended as an easy way to refresh your foundational scuba safety knowledge and skills if you haven't been diving in a while. Divers who complete both the knowledge and in-water skill refresher receive a replacement certification card with a "ReActivated thru" date on it.
