

PADI Tec 45

The PADI Tec 45 course is the second part of the full PADI Tec Deep Diver program. You'll extend your depth limit to 145 feet and learn to plan and execute repetitive decompression dives using a single stage/decompression cylinder. It puts you in a complete tec diving rig, which can be either backmount or sidemount. You'll also make accelerated decompression dives using EANx or pure oxygen. This is a course where you'll rise to the challenge and make the commitment to become a technical diver.

COURSE REQUIREMENTS

Academic Sessions
4 open water dives conducted over 2 days

PREREQUISITES

Minimum Age: 18
PADI Tec 40 Diver
PADI Rescue Diver
Have a minimum of 50 logged dives, with at least 12 dives on EANx deeper than 60 feet and 10 dives deeper than 100 feet
Minimum of 50 logged dives
PADI Medical statement signed by physician with the past 12 months
